## About Me

I am a technology enthusiast who enjoys solving problems through programming and web development. I believe websites should be accessible, easy to navigate, and usable by everyone, including people who use assistive technologies.

My goal is to build practical digital solutions while continuously improving my technical and problem-solving skills.

## Technical Skills

HTML5 CSS3 JavaScript Java Python Django SQL Git and GitHub Responsive Design Web Accessibility

## My Projects

### RentConnect

A rental platform concept that helps users discover houses, flats, and paying guest accommodations.

**Technologies:** Python, Django, HTML, CSS, PostgreSQL

### Personal Portfolio

A responsive portfolio website designed using semantic HTML5 and accessibility best practices.

**Technologies:** HTML5, CSS3, JavaScript

### Java Programs

A collection of programming exercises covering data structures, algorithms, and problem-solving.

**Technologies:** Java 8, DSA
